STEM Pathway

General Science AS (Chemistry Concentration)

The General Science (Chemistry Concentration) program provides the first two years of study for a student who plans to transfer to a 4-year institution to pursue a bachelor's degree in science. It prepares students to enter into any one of a number of fields of science or healthcare. This degree provides a pathway for students who are interested in the sciences and allows them to explore various areas in the scientific realm.

Fall

Course	Credits
MATH 1215: Intermediate Algebra	3
ENGL 1110: Composition I	3
Gen Ed Arts and Design: Choose one course	3
Gen Ed Student Choice: Choose one Gen Ed recommended course: • CS 108L • ECON 2110 • ECON 2120	3

Spring

Course	Credits
MATH 1220: College Algebra	3
ENGL 1120: Composition II	3
Gen Ed Humanities: Choose one course	3
Gen Ed Social and Behavioral Sciences: Choose one course	3

Summer

Course	Credits
MATH 1240: Pre-Calculus	3
MATH 1230: Trigonometry	3

Fall

Course	Credits
MATH 1512: Calculus I	4
PHYS 1310: Calculus-Based Physics I Lecture and PHYS 1310L: Lab	4
CHEM 1215: General Chemistry I Lecture and CHEM 1215L: Lab	4
ENGL 2210: Professional and Technical Communication	3

Spring

Course	Credits
MATH 1522: Calculus II	4
CHEM 1225: General Chemistry II Lecture and CHEM 1225L: Lab	4
BIOL 2996: Undergraduate Research	4
PHYS 1320: Calculus-Based Physics II and PHYS 1320L: Lab	4

Summer

Course	Credits
Gen Ed Second Language: Course	3

Total Program Credit Hours, including 3 prerequisite credit hours = 64

Career and Educational Advancement Opportunities

This is intended to be a transfer program. It includes many requirements for a bachelor's degree in the fields of biology, chemistry, physics, or health sciences. Options within the degree should be determined by the major or profession the student wants to pursue and/or the admission requirements for undergraduate programs or professional schools. Students pursuing this degree may be interested in dental hygiene, medical laboratory sciences, nursing, occupational therapy, physical therapy, pharmacy, physician's assistant, radiology, or medical school in the health sciences. Students wishing to pursue careers that require a basis in Biology, Chemistry, Physics, Environmental Science, etc., may also choose this degree. Most baccalaureate and professional programs are competitive in that they only accept a limited number of students. Grades in science and math courses will be very important and additional standardized testing will be required. UNM-Valencia does have an undergraduate research program where students can begin learning about higher education research. To learn more, talk to your science instructor.
